Dear friend,

Let's cut to the chase.

Here's the trading setup, entry rules, stop loss rules, and exit rules of this system. I truly believe it can potentially generate much more than 10 pips a day...

...but I'm sure like me, you're probably sick of those unbelievable claims from the self-proclaimed forex 'gurus'... You know, promises of 1000 pips a day... trillions of dollars overnight...

OK. Enough of my rants. Let's get started right away:

Timeframe: 1-hour.

In this system, we use 3 indicators:

1. 5-period Exponential Moving Average (EMA 5) applied to the Close.
2. 12-period Exponential Moving Average (EMA 12) applied to the Close.
3. 21-period RSI (RSI 21)

This is a product of [Automated Forex Cash](#)

Entry Rules for Long Trades:

It's simple. We enter a long trade when EMA 5 crosses EMA 12 to the upside... AND our RSI 21 > 50.

Entry Rules for Short Trades:

Enter short when EMA 5 crosses EMA 12 to the downside.
AND RSI 21 < 50.

Stop loss = 20 – 30 pips... depending on the volatility of the currency pair. For more volatile pair, like GBP/USD, stop loss = 30 . For less volatile pair, like EUR/USD, use stop loss of 20 pips.

Timeframe: 1-hour

Exit Rules for Long Trades:

Exit the trade when EMA 5 crosses back below EMA 12

Or when RSI 21 < 50.

Or when price stalls at major resistance, trendline, pivot points, Fibonacci projection target.

Or when bearish engulfing patterns or inverted hammer patterns form.

Exit Rules for Short Trades:

Exit our short trade when EMA 5 crosses above EMA 12
OR RSI 21 > 50

There you have it. A manual trading system for consistently making a conservative 10-pips-a-day. I hope you enjoy this short publication 😊

Thanks and I'll talk to you soon,

John Chen
